Maintain rollers to reduce the pushing and pulling forces needed to handle cases. Cold food storage You need to keep cold foods at 5 °C or colder, and keep frozen foods frozen solid during storage at —15 °C or colder. Accordingly, the regulations for color additives address concerns that arise outside the food industry.

Handling Frozen Foods from Warehouse Receiving to Retail Display

This way, juices from the raw food cannot drip onto cooked food. Food serving and labelling Store food in clean, food-grade storage containers that are strong enough for the food they contain. If pricing, use a glove with textured fingertips to wipe frost from frozen foods.
