

Introduction to applied entomology

Ronald Press Co. - Entomology

Pathogens: Microsporidia

- An important Midwestern example is *Nosema pyrausta*, a pathogen of the European corn borer.
 - Infections usually do not cause rapid death
 - Slows development, females lay fewer eggs (many of which die)
- *N. pyrausta* causes periodic collapses in European corn borer populations in Illinois and neighboring states.

- Microsporidia have not been commercialized as biopesticides except for *Nosema locustae*, a species that attacks grasshoppers.
