## Strassen

We can improve this method further.

## Strassen's Matrix Multiplication Algorithm

These are also compositeness tests.

## Strassen

In , the Strassen algorithm, named after , is an. The subsequent discovery of the Solovay—Strassen and Miller—Rabin algorithms put PRIMES in.

## Strassen algorithm

Note that if  $i$  and 30 were not coprime, then  $30k + i$  would be divisible by a prime divisor of 30, namely 2, 3 or 5, and would therefore not be prime. Factorization is thought to be a computationally difficult problem, whereas primality testing is comparatively easy its is in the size of the input.
