Requirements for Accrediting Bodies of Mammography Facilities. Washington DC : National Academies Press US ; 1996.

Front Matter

The NRC's QM rule calls upon NRC licensees to establish a QM program in compliance with 10 CFR 35. They regulate all external beam therapy teletherapy except cobalt teletherapy, and they regulate some applications of brachytherapy and therapeutic nuclear medicine those that employ NARM; most such procedures, however, employ NRC-regulated byproducts.

Radiation In Medicine A Need For Regulatory Reform PDF Book

The NRC modified Riverside's byproduct materials license to require full annual calibrations, monthly spot checks, and detailed record keeping. Standards for all marketed radiopharmaceuticals are set out in USP's National Formulary.

Radiation in Medicine by Institute of Medicine, Committee for Review and Evaluation of the Medical Use Program of the Nuclear Regulatory Commission

Thus, all of these laws, by their terms, required complete compliance by radiation products to the same extent and in the same way as any other drug or device. Each administration must be in accordance with the written directive. Lohr, as Director of the Division of Health Care Services, drafted the original proposal that led to this study and provided valuable guidance and editorial assistance over the duration of the project, including review and comment on several chapters.
