If you own land along one of the state's waterways, you may qualify to participate in, and receive the benefits of this program.

A global survey of "TURF

But as by Corbett Grainger and Christopher Costello 2014 illustrates, not all property rights systems are created equal. Rather than setting strategic objectives, as the EU does with conservation legislation, exclusive competence means that the EU has total control unless it has delegated some aspect to member states.

We also examine the differences between two TURF-reserve archetypes and find that those developed with a strong history of customary tenure share distinct qualities from those created in a more recently established, government-mandated system. However, the devolution of fisheries management within its EEZ, to Scotland, Wales and Northern Ireland, means that the passage of any significant reforms will need to be coordinated between the four nations of the UK, which will undoubtedly add a layer of complexity. Economists argue that private property rights will improve efficiency, increase profitability, and lead to sustainable harvesting of marine resources ;.

Public Fishing Rights and the Landowner

The move toward property rights appears to have had positive social benefits as well.

The recognition of property rights in marine resources can also make it easier to adopt additional conservation measures. It is easy to see how quota, and the concentration of its ownership, has played a part in that narrative.

Fishing rights, property rights, human rights: the problem of legal lock

This possibility stems from a function of the rule of law and the courts, particularly in common law jurisdictions, to curb the power of the state.
