**Elephant Herds and Rhino Horns by
Don Arthur Torgersen**

Founded in 1977 by Dr.

The Anatomy of an Elephant

Many families contain up to four generations of elephants, and all family members help in the rearing of the young. Ngulia is primarily a fenced sanctuary, protected by rangers and staff and supported by the African Wildlife Foundation. Online Shopping and Product Donations You can easily turn your everyday shopping habits into an effective means to help combat the African poaching crisis.

ERP

HOW ERP OPERATES ERP is run with the discipline of a business, rather than like a conventional nonprofit Drawing on the resources in , we have expertise in building partnerships, executing projects and growing economic wealth, and we apply these skills to the challenge of poverty in rural communities, with reference to elephant and rhino conservation. Many conservation officials believe that this is the reason that 700 can still be found in the country. Elephants cover their bodies with sand and mud to protect themselves from insects and the sun , but flies remain an issue.

Are Rhino horns and Elephant tusks being dyed pink to deter poachers?

The centre is actively involved in the rehabilitation of poached rhinos and other wild animals, the breeding of rhinos and other endangered animal species for reintroduction into the wild, the education of the general public concerning poaching and habitat loss, and the development of regional anti-poaching initiatives. She has written for The New York Times, Scholastic, Popular Science and Spectrum, a site covering autism research. It is a multi-billion dollar business that has made many people very wealthy.

Elephants and Rhinos Will Not Be Killed For Their Tusks And Horns

These men and women are on the front line, defending elephants and rhinos against ruthless poaching gangs. A reverence and respect for elephants, not simply their parts, but the sum of their parts, as one magnificent animal with its own right to life, is desperately needed to protect the

species globally.

Fact check: Rhino horns and elephant tusks are not being dyed bright pink to deter poaching

Baby Elephant Having Fun With His Trunk This baby elephant is in the comforting presence of his mother, grandmother, siblings and other family members — which is a perfect time to be silly and experiment with his trunk.

ERP

Former President Obama has described wildlife trafficking as a major threat to national security. Rhino horns grow a little over two inches a year in younger calves and a bit slower in the older rhinos.
