One project looks to construct a relief system for off-site drainage, noting that Highland Road floods during heavy rains and that one residence has previously flooded.

Hillside Erosion Control

The goal is to improve water quality by reducing runoff and conserve local water supplies by selecting ecologically appropriate native or adapted plants that require less water, pesticides, and fertilizers. This grant will cover the purchase of the native grass seed. The variety of leaf structure and plant size also help disperse the rain as it falls to the ground.
