and Children Fishery Collapse and Women in Newfoundland and Labrador

Changes in the TAC should generally not exceed 15% of the previous TAC, unless the stock is declining precipitously. Observers also collect valuable scientific information including size composition, catch, effort, by-catch composition etc.

CBC Archives

Northern Shrimp are protandrous hermaphrodites.

Northern shrimp and striped shrimp

My husband's boat was damaged by fire and, with no insurance, it was downhill from there.

and Children Fishery Collapse and Women in Newfoundland and Labrador

This is one of only two national historic sites in Canada so recognized for their Irish heritage.
