1 Our Local Cosmic Laboratory

The spectral shape agrees well with what is expected from secondary gamma rays produced in line-of-sight interactions of cosmic rays with background photons. Our local space environment—the heliosphere with its central star the Sun and orbiting planets—provides examples of many of the structures and processes that cosmic plasmas exhibit.

Storm in a cosmic teacup: A new paradigm for understanding plasma turbulence

First, it likely occurs wherever dynamos create magnetic fields—almost everywhere in the universe.

Part I. Cosmic Rays in Galactic and Extragalactic Space

Cosmic magnetic fields possess intriguing gigantic-scale coherent structures.

Cosmic plasma

De Sanctis Mainz Germany , 7-9 October 1992 Pag. A diversified programme of this kind runs the risk that the communication between the various fields of specialization remains insufficient. P72 1987 Nagoya, Japan 1987 SYMPOSIUM ON ENGINEERING PROBLEMS OF FUSION RESEARCH - Call Number: TK9204.

Plasma Astrophysics and Cosmology: The Second IEEE International Workshop ...

As a science, space plasma physics is moving beyond the initial discovery phase to one in which detailed understanding of the physics is being sought. LOCAL PLASMA ASTROPHYSICS Astronomy and astrophysics are sciences that have mature aspects e. The properties of cosmic rays, such as direction, energy and particle type are derived from the radio measurements.
