## Burns: Types, Symptoms & Treatment

Talk with our lawyer referral specialists to get connected to a lawyer who can help you: 844-549-8774. Emergency medical attention is necessary for third-degree burns treatment. Accidental burns can happen to anyone, although children, teenagers and older people are most at risk.

### How to Treat a Burn

These innovative and expensive treatment modalities play an important part, but the way in which a burn patient is initially managed carries an equally important role. Whether your burn was minor or serious, use sunscreen and moisturizer regularly once the wound is healed. Even first- and second-degree burns can become infected and cause discoloration and scarring.

### How to treat a first

If a blister breaks, clean the area with water mild soap is optional. Communication with the anesthesiologist is important to ensure the patient does not fall behind in resuscitation.

### [Treatment of serious burns]

But if a rash appears, stop using the ointment. Perfusion of potentially viable burn wounds is critical. Some of the burned skin might come off with washing.

### Burns and scalds

Grafts on the forehead tend to do better than other areas since pressure works better and the ability to contract is more limited.
