The world historical significance of Japan Kenneth B.

美濃部亮吉 1904

For two weeks beginning on June 5, 1972, one hundred and fourteen countries, nineteen intergovernmental agencies, and over four hundred nongovernmental organizations converged on the city of Stockholm to participate in the formal UN conference and in many other parallel symposia, rallies, and events.

Needless to say, it was a perspective that grew directly out of their experience with very localized environmental injustices in Japan. The original text was then translated into English by a group of seventeen Japanese volunteers and subsequently polished for publication by Anthony Carter, an American missionary involved in the movement. So-called environmental prophets of doom, for example, warned about the dire implications for the planet of population growth, over-reliance on technology, depletion of resources, and reckless economic growth.

But engaging in the global environmental movement did not mean abandoning the local. But with the onset of widespread industrial pollution and severe degradation of the human living environment, cracks appeared in this seemingly rock-solid orthodoxy and, for Tsuru, presented an opportunity for economists and political leaders to reconsider the dictum that an increase in GNP is, ipso facto, an increase in welfare.

Earthly paradise

Familial imagery aside, however, Dai Dong served as a vocal and often militant mouthpiece for an emancipatory environmentalism advocating the rights of developing nations. Tsuru Shigeto: The Quintessential Rooted Cosmopolitan Pollution victims and their supporters like Ui Jun were not the only Japanese voices audible in this early 1970s upsurge of environmental concern worldwide.

Primate origins and evolution

Nowhere in the report was there any sense that many Japanese people regretted their path to economic affluence, nor was there any indication that some of them were now reconsidering the benefits of so-called growth. Reuniting the two, however, offered a way forward, because a model of development inclusive of human welfare would implicitly recognize the necessity of a habitable living environment while accepting certain necessary levels of economic growth. A combination of fury and obligation informed this agenda: fury p.
