10 Black Inventors Who Changed Modern Life

Telephone Inventor: In 1876, Alexander Graham Bell joined two cups with a thread at the bottom of both ends and used it to talk from one end and listen from the other. Though several inventors did pioneering work on electronic voice transmission many of whom later filed intellectual property lawsuits when telephone use exploded, Alexander Graham Bell was the first to be awarded a patent for the electric telephone in 1876. When the temperatures plummeted in the colder months, the fermentation process on the wine would stop temporarily—and when it began again in the spring, there would be an excess of carbon dioxide inside the wine bottles, which would give the wine unwanted carbonation.

10 Modern Inventions That Will Change Our Lives

Though he had been trying to create a weatherproof rubber for years, he was only successful in doing so when he accidentally dropped some regular rubber mixed with sulfur onto a hot stove and found that it still maintained its structure.

35 Inventions That Changed the World

Silly Putty Shutterstock During World War II, engineer James Wright was tasked with inventing a cheap alternative to synthetic rubber. The classical wooden blocked machine was replaced with movable metals later for more efficiency and durability. Thus, it runs with great accuracy without any downtimes.

11 Innovations That Changed History

For example, Davis's backstaff or quadrant, invented by the English navigator And described in his book Seaman's secrets In 1594, replaced the quadrant, the astrolabe and the rod of Jacob as an instrument to measure the height of the celestial bodies in the horizon and thus to determine the latitude. It radically changed the city life just by expanding the population in the suburbs.

11 Innovations That Changed History

Unfortunately, didn't catch on, and both were expensive commercial flops.

10 Black Inventors Who Changed Modern Life

And though the drug proved to be ineffective at helping angina patients, study participants did find that the little blue pill was able to increase the frequency and potency of erections. Also in its design was found a bag to urinate.

Top 8 Inventions that Changed the World

This box is called a compass, hence the name Compass. With the RAMAC, a mechanical arm would retrieve data by storing data at a particular magnetic orientation. Popsicles Shutterstock Believe it or not, the popsicle's creator was none other than an 11-year-old boy named Frank Epperson, who simply mixed some soda powder with water and left it out overnight with the stirrer still in entirely by accident.
