Then, how any man could assert that I ever entertained the opinion that slavery did not need protection from aggression, is to me the strangest, falsest thing in nature. There are Senators here at this moment who will sustain me when I say that, when in caucus and we had under consideration this series of resolutions, I said, and said it boldly and in plain terms, that if every man from every southern State of this Union would come here and say, for the sake of peace, if you please, or any other reason, he was willing to abandon his equality, his right in the common territory, then, if alone, I would stand and protest against it; protest that he had no right to surrender a constitutional right; that none but a coward would do it; that every man had a right in the common territory; that it was his privilege, and he should never surrender it with my permission.

On the other hand, I said that if every northern man in the Senate Chamber — nay, but even every northern citizen — expressed a desire to surrender his right, his equality, his privilege, to go to the common territories with his property, I should enter my Solemn protest against it, and insist that he had a constitutional right to go there which he should never surrender with my consent. I said, as have shown you, that I had voted against all amendments, and would continue to vote against all amendments, or any attempt whatsoever calculated to obstruct the message of the resolutions; for they asserted the right of the people to go to the Territories, asserted the power of the court to protect them in the possession of their property, and that if the court failed to protect them, Congress should afford the necessary authority to do so.
