Hearing Aids Richfield and Mound, MN

Researchers have also estimated that as many as 17 percent of teens ages 12 to 19 have features of their hearing test suggestive of NIHL in one or both ears, based on data from 2005-2006. When you are exposed to loud noise over a long period of time, you may slowly start to lose your hearing.

Hearing Aids Richfield and Mound, MN

People of all ages, including children, teens, young adults, and older people, can develop NIHL. Outer Ear The outer ear—the part of the ear you see—funnels sound waves into the ear canal.

Noise

You might not hear whispers, sound might seem muffled, or you may hear ringing in your ears.

Hearing Aids Richfield and Mound, MN

The whirl of city life. This is totally fine for your ears. These bones are called the malleus, incus, and stapes.

Bellevue & Issaquah ENT

Source: Yoshiyuki Kawashima Most NIHL is caused by the damage and eventual death of these hair cells.

Listen Up! Protect Your Hearing.

If you expose your ears to excessive sound pressure, you can harm those small hair cells in your ears.

Sound and Hearing

The sound of your dishwasher running 45 to 65 dB Embedded audio file with an example of a dishwasher in operation. This is because the hair cells, similar to blades of grass, will bend more if the sound is louder. Sound is measured in units called decibels.
