Igor Sikorsky Biography, Life, Interesting Facts

In early 1911, he developed his first practical aircraft, the S-5, which established four Russian aviation records: an altitude of 1,640 feet, a distance of 52 miles, a duration of 52 minutes, and a ground speed of 77 mph.

80th birthday : The genius of Igor Sikorsky

The inventor knew that due to a lack of on-board power and sufficiently resistant materials, the road would be long before the possibility of reaching the goal.

Igor Sikorsky

Sikorsky's career in Russian aviation. The first copy would be delivered in 1942. He began his experiments immediately, in the small hotel room in Germany where he was staying, by building a crude rotor and then measuring its lifting forces.

Igor Sikorsky and the History of the Helicopter

The first among them was Igor Sikorsky. A year later on another trip to Germany with his father he found out about the accomplishments of the Flyer.
