Topological Nonlinear Analysis

Digital Library Federation, December 2002.

Topological bifurcations of central configurations in the N

Biomechanical ordering of dense cell populations.

Topological Nonlinear Analysis II von Michele Matzeu

MDCK cells expressing constitutively active Yes-associated protein YAP undergo apical extrusion depending on neighboring cell status. A common feature of these articles is to start with a historical introduction and conclude with recent results, giving a dynamic picture of the state of the art on these topics. The process is still going on and the achievements in this area are spectacular.

Topological nonlinear analysis : degree, singularity, and variations in SearchWorks catalog

Fluid dynamics and noise in bacterial cell—cell and cell—surface scattering. Epithelial tissues epithelia remove excess cells through extrusion, preventing the accumulation of unnecessary or pathological cells. Nonlinear dynamics and rheology of active fluids: simulations in two dimensions.

Topological defects in epithelia govern cell death and extrusion

Michele Matzeu Alfonso Vignoli Editors Topological Nonlinear Analysis II Degree, Singularity and Variations Classical Solutions for a Perturbed N-Body System Gianfausto Dell'A Antonio O. A common feature of these papers is that of starting with an historical introductory background of the different disciplines under consideration and climbing up to the heights of the most recent results.

Topological Nonlinear Analysis II von Michele Matzeu

A most promising and rapidly developing field of research is the study of the role that symmetries play in nonlinear problems. . Michele Matzeu
