Richelieu : a tale of France in the reign of King Louis XIII : James, G. P. R. (George Payne Rainsford), 1801?

In his hand he carried a firelock, which, by a natural impulse, was pointed at the Norman the moment he perceived a doublet of blue velvet—as the fowling-piece of a sportsman is instinctively carried to his shoulder, on the rising of a partridge or a grouse. He has resisted, and been wounded. Although much improvement in all the arts of life, and much increase of population had taken place during the latter years of Henry the Fourth, and under the regency of Mary de Medicis; yet at the time of their son Louis the Thirteenth, the country was still but thinly peopled, and far different from the gay, thronged land, that it appears to-day.

In private life, he was honourable, generous, and kind; but it was his axiom, that all must yield to State necessity, or as he said in other words, to the good of his country; and upon the strength of this maxim, which, in fact, was the cause of every stain that rests upon his memory, he fancied himself a patriot! The charger rushed furiously on; but the Woodman caught the bridle as he passed, and with some difficulty reined him in; while one of the footmen lifted the young gentleman to the ground, and placed him at the foot of a tree. His appearance, however, was now very much changed for the better.

Of course there was a great deal to be told, and De Blenau was listening delighted to an account of the considerate kindness with which the Countess de Chavigni had treated his Pauline, when the sound of voices approaching towards them stopped her in her history. Germain, night had fallen over their road, and nothing could be distinguished by those within the carriage, but the figures of the two horsemen who kept close to the windows. Containing a great deal that would not have been said had it not been necessary.

My words were bolder than my thoughts, and I only meant to say that I could wish to see my Monarch show himself that great King which he naturally is. He has never betrayed you at least to my knowledge.

True it is, the Norman had abandoned his free companions of the forest, and received the wages of Monsieur de Chavigni; but still he kept up a kind of desultory correspondence with his former associates, and had not lost sight of them till certain reports got about, that the Lieutenant Crininel was going to visit the forest of Laye, which induced them to leave the vicinity of St.

As they proceeded on their way towards the gates of the Park, a figure presented itself, which, from its singularity, was worthy of notice.

That minister, however, with the deep diplomatic skill for which he was conspicuous, instantly availed himself of the weak point in the character of his mistress, and through the medium of her confessor, won her to his purpose.
