The Nature of Judgment (1899). By G. E. Moore in MIND New Series, Vol. 8, No. 30 (Apr., 1899) // Fair Use Repository

We may indeed be mistaken in supposing that they are true; but if we were ever to find that heaviness was not an attribute, we should be bound to conclude that it never had been and never would be, not that it was so once but had ceased so to be. Jesus explained this to Nicodemus. The truth of empirical judgments is the bottom-level sort of truth for Kant, in that all of the other kinds of truth presuppose it.

Trustworthiness: Your Brain Makes a Judgment in Milliseconds

I tried to consider, if there was no other sin in the world when Jesus had come to Earth, would he have still died, had a corruptible body? Scanned, proofed and corrected from the original edition for your reading pleasure. May He richly bless you too sir, and may tomorrow be a day of true worship and glorifying Him for us.

Objectivity: True

Kant would seem to include among empirical propositions all those in which an empirical concept is used; whether the proposition asserts a necessary relation between an empirical and an a priori concept, or between two empirical concepts.

Trustworthiness: Your Brain Makes a Judgment in Milliseconds

I would go so far as to assert that, wherever the relation between the subjective reaction and the physical variables is fully understood, and the physical variables can be measured with the necessary degree of absolute and repetitional accuracy, the objective method should be used. And this implies that it is a procept which, in its direct bearing, may affect not the entire course of his life but rather, say, his haymaking operations this season. Robert believes that the Bible contains the truth that God wants us to base our lives upon.
