These shifts in dairy consumption will require changes in the supply chain and in processing capacity to ensure the right products are manufactured to meet demand.

The Rising Importance of Single Person Households Globally

We also recommend using national or regional indexes, due to the volatility of local indexes. The trend should continue in 2019, with an increase in mortgage loans but a slowdown in consumer credit. Bovendien biedt Groenekenis gebruikers de mogelijkheid om via de E-mail geattendeerd te worden op aanvullingen in specifieke vakgebieden.

The CPI is subject to both limitations in application and limitations in measurement. If there is no CPI for the area you are in, we can provide some guidance on a recommended area to use instead, but users must make the final decision. Policy makers and companies can use this information to help inform product labeling and better target necessary segments to increase product awareness and better the dairy industry as a whole.
