It is unusual for a tree-climbing animal to lack a tail, so it seems probable that the ancestors of both were ground-dwelling animals, and the koala secondarily moved back into the trees. Their ancestors came from the north in several waves probably from about 4 million years ago. We create pathways to a healthier future through our research funding, our health guidelines and the ethical standards we set and uphold.

A Field Guide to the Mammals of Australia by Peter Menkhorst

In addition, there are detailed maps for every species. The non-confidential submissions to the public consultation can be viewed at the. Melbourne, Australia: Oxford University Press, 1970.

List of mammals of Australia

Dugongs are found in coastal waters from Brisbane northwards, across the Top End and then southwest to a similar latitude.

Australian Mammals

Queensland Museum, Environmental Protection Agency of Queensland, With the generous support of Packers Associated Tanners Pty Ltd. It is very disappointing that my enquiry may have been thrown into rubbish bin.

A guide to the native mammals of Australia (1970 edition)

They can be seen in captivity in Qld , Australia Zoo Qld , Tas , Tas and various other zoos and wildlife parks. Minke whales visit the northern Great Barrier Reef during the winter months May-August and during this time show a keen interest in boats and people. .
