Fire

Data users are cautioned to consider carefully the provisional nature of the information before using it for decisions that concern personal or public safety or the conduct of business that involves substantial monetary or operational consequences. Clicking the link takes the user to the Special Smoke Statement or to a list if there is more than one. While the information presented by this feed can be several days old, it does present important management information including the fire name, overall fire size, and containment.

B&Q

The NowCast uses longer averages during periods of stable air quality and shorter averages when air quality is changing rapidly, such as during a wildfire. Our pledge has always been to make YFIRES a free service to users. Sensor technology provides thousands of additional particle pollution data points that can be used to supplement the air monitoring stations operated by official air agencies.

2021 Fire Season Outlook

Does the pilot distinguish between government- and community- deployed sensors? EPA does not use sensor data for regulatory purposes.

Active Fire Mapping Program

Data lag in transmission to AirNow is dependent on the specific monitor data transmission methodology and agency involved.

Welcome to CAL FIRE

Smoke Plumes Smoke plume locations are based on information from the NOAA Hazard Mapping System based on polygons drawn around smoke detected in satellite imagery.
