## Visual perception and processing • The Brain Recovery Project

The words verbalize the current belief and affect experienced by the client when the dysfunctionally stored memory is accessed. We were able to confidently measure number and duration of fixations as well as saccade length in Experiment 1.

## Collection of Ambiguous or Inconsistent/Incomplete Statements

The variance of word meanings in natural language has always posed problems for those who attempt to construct an unambiguous and consistent statement. They found 19 articles that included 27 separate experimental studies. Principle 8: Make sure that relevant adults know how to use systematic recast procedures.

## Can children resist making interpretations when uncertain?

Prospective processes relate actions to one another through operations such as sequencing and planning.

## Process Mapping

For this reason, developmental changes in episodic memory performance are viewed as the driving factor in source monitoring development.

## Visual perception and processing • The Brain Recovery Project

The VOC rating provides both client and clinician with a baseline with which to assess a given session's progress, thereby further promoting client treatment adherence.
