**The hydrophobic effect: formation of micelles and biological membranes : Tanford, Charles, 1921**

This almost entirely rewritten edition remains the only comprehensive, up-to-date account of the subject available today—with nearly half of all literature references made to work done since 1973. Edited by Linked existing covers to the edition. .

**The hydrophobic effect: formation of micelles and biological membranes. (1973 edition)**

Theoretical treatment of micelle formation has been greatly improved, making it possible to predict from first principles the size and size distribution of micelles formed by many simple amphiphiles. Also includes entirely new chapters on serum lipoproteins and on membrane proteins.

**The hydrophobic effect: formation of micelles and biological membranes : Tanford, Charles, 1921**

Defines four distinct modes of association between protein and detergents or other amphiphiles , and gives a plausible explanation to show why some ionic detergents generally denature proteins while nonionic detergents often do not. . .
