Following chapters discuss the fundamental economic doctrines related to market power, the role of market power in market definition, and the measurement and interpretation of market shares and market concentration. The focus of the book is a complete and detailed perspective on issues in the design and enforcement of competition law, and is not a treatise on the case law.

Handbook on European Competition Law

Term 3 - Online Fees This is a wide-ranging subject that will consider the modern origins of economic competition theory, its interrelation with international trade, the historical development of national competition law regimes, and how competition law and policy have been affected by geopolitical shifts over time. In the 12 chapters and over 260 page final, Enforcement Section, you'll find a detailed discussion of the issues in competition law enforcement, including the mechanisms for enforcement, the fashioning of criminal, injunctive, and monetary relief, and the extraterritorial reach of a jurisdiction's antitrust laws. A few criticisms could be noted, not to cavil but to give the authors room for improvement.

Historical Foundations of EU Competition Law

There are certain parts of the RBW book that are particularly well done and extremely useful. It is written with economy, precision and full citation
