Immunopharmacology: immunomodulation and immunotherapy

. The authors found that 6 of the 11 monkeys showed signs of viral rebound 28 weeks after antiretroviral treatment was suspended.

Immunopharmacology: immunomodulation and immunotherapy

Description Seoul : Hanseobon, c2004 798 pages : ill. Additionally, they were only monitored for 28 weeks, whereas in humans HIV can take up to two years to rebound.

Immunopharmacology: immunomodulation and immunotherapy

Dan Barouch and colleagues administered a combination of a broadly neutralizing antibody and an innate immune system stimulator to 11 rhesus monkeys that were infected with a form of the virus that infects non-human primates and were undergoing antiretroviral therapy. About this award, the company says: The company Contemporary Literature annually honors the year's most outstanding works in fiction, poetry and criticism through its annual Contemporary Literature Prize, one of the most coveted literary awards in Korea, to encourage creative spirit of the literary elites of the nation. This was apparently the first report that active immunization against GnRH-tandem-dimer-ovalbumin conjugate in Specol adjuvant was an effective alternative to surgical castration for Tibetan rams under practical Tibetan plateau conditions.

Contemporary Literature (Hyundae Munhak) Award

They arranged a meeting and met at a where they asked him to walk and signed him on the spot. The stimulator activated both uninfected immune cells and those harbouring the virus, allowing the antibody to flag the infected cells for elimination. The monkeys began antiretroviral therapy shortly after infection, so their viral reservoirs may have been small and relatively easy to eliminate.

Contemporary Literature (Hyundae Munhak) Award

Immunopharmacology has changed dramatically over the past 25 years.

Contemporary Literature (Hyundae Munhak) Award

The authors conclude that, in principle, broadly neutralizing antibodies could offer a useful strategy against latent HIV infection in humans, although further testing is required.
