External training providers and courses

Workers should have plenty of water available on-site as well as a shady place to prevent dehydration and exposure-related illnesses. Give them some recognition, thank them, and tell them to keep on practice the safe work habits. Carrying loads on one shoulder, under an arm, or in one hand creates uneven pressure on the spine.

Four Mindsets That Cause Accidents

The trainer at Swing Staging was very good.

Safe Patient Handling and Mobility (SPHM)

The highest hazard areas are concentrated in regions of man-made landfill, especially fill that was put in place many decades ago in areas that were once submerged.

Workplace health and safety management system

Response: OSHA does not have a standard which sets limits on how much a person may lift or carry.

Four Mindsets That Cause Accidents

Additional Considerations Other considerations may not seem quite as exciting but are equally important. Employers in many industries now hire workers with intellectual or developmental disabilities to work in integrated environments.
