Social Media and Health Care Professionals: Benefits, Risks, and Best Practices

Includes Compendex and Inspec for journal abstracts and links to full-text, Website abstracts for evaluated Web sites; US Patent Office for patent information, CRC Press handbooks for technical engineering information, and Industry Specs and Standards from Techstreet standards. This document includes practical guidelines for governing the appropriate use of social media in the health care environment by nurses. See the UKeU Overview, especially Section 3, for a description of the early days of UKeU.

University of Kentucky

A strong social media presence was also interpreted by 81% of consumers as being an indication that a hospital offers cutting-edge technologies. In contrast, other studies have found that Wikipedia includes factual errors and has a lack of depth compared to traditionally edited, peer-reviewed, evidence-based information sources. This is an early example of student controlled, individualized use of computers in education.

National Library of Medicine

A study found that 70% of 35 junior physicians used Wikipedia to find medical information during a week-long period, with 93% citing ease of use as their primary motivation. When used in this way, real-time social media sites provide greater agility and enhanced preparedness for responses to disasters and public health emergencies.

History of virtual learning environments

One of the main motivations was its applicability to online learning. DOE PAGES offers free public access to the best available full-text version of DOE-funded scholarly publications - either the peer-reviewed, accepted manuscript or the published scientific journal article - after an administrative interval of 12 months. Pathlore was acquired by SumTotal Systems in 2005.

National Library of Medicine

This blog also includes a special section on admission note templates, procedure guides, and related material. Behavior that could be construed as unprofessional includes violations of patient privacy; the use of profanity or discriminatory language; images of sexual suggestiveness or intoxication; and negative comments about patients, an employer, or a school. Market, industry, and country statistics, studies and infographics.
