## Plant development: Stomata as a Model for Stem Cells

Physics teachers are an endangered species and the Institute is determined to do whatever it can to support them. It is a remarkable property of gravity that its specific problems provide a framework that calls for the interchange of ideas, concepts and methodologies from very different communities.

On the second day, experts debated pre-agreed topics with the aim of producing a consensus statement with a focus on the current state of our knowledge and key gaps for further development. The second discusses the attempt to build a single molecular wire, and then decide whether such a wire is indeed conducting.
