He always seeks patterns: waves of reported sightings in specific locations, for example. Emperor Charlemagne's edicts forbade the perturbing of the air, provoking of storms by magical means and the practicing of mathematics. Agobard, the archbishop of Lyons, is said to have freed three men and a woman who had come down from one of these spaceships, and were accused by the mob of being emissaries sent by Grimoald, Duke of Benevento, to spoil the French harvests and vintage by their enchantments.

But until we agree as an academic community to look into it, we're unlikely to find out, as it does not overtly reveal itself to us. Apparently they realize that there is very little chance that the 'problem' can be solved without the support of the general public. Why is the government, through the '80s and up to present, still spreading falsified data? When the Colorado project published its controversial report discouraging further research on the UFO phenomenon, Vallée returned to France in disgust, and distanced himself for a time from the scientific community.
