Comparative Youth Justice

These notions of the normality of much youth offending and of punishing the crime, not the person, did appear to be successful initially. Finally, are the relationships of these youth with the police so tense that it accelerates their route to court? In the smaller prospective study only 58% of victims or their representatives attended. New York: Oxford University Press.

As in all European countries, official data concerning young offenders is ambiguous and controversial. Child safety orders, Local child curfews and Anti-social behaviour orders all included in the Crime and Disorder Act 1998 do not necessarily require either the prosecution or indeed the commission of a criminal offence.
