Reading Acquisition Stages, Value of Language Development

Plaintiffs' hypothesis implies, for instance, that of the 328 items on the WISC-R, spread across twelve sub-tests of different kinds of subject matter and standardized on a sample that included representative numbers of blacks, there is not a single item which is not culturally biased against blacks. The cards used for the actual test contain the following: three squares and a circle; three white balls and a black ball; three dogs and a cat; three chairs and a table; three saucers and a cup.
