Ebenezer Emmons, 1799

Other scientists wanted to know what was moving these continents around. The mining interests of this State are worthy of the consideration of the public. Today, satellites capable of measurement of plate motion provide a more direct method.

Plate Tectonics

Some disagreements arose about which liquid floated on which. In Lincoln county and Catawba it is white, fine and even grained, and fit, provided large blocks can be obtained, for statuary. In each district, that of Berkshire, Massachusetts, and the midland counties of North-Carolina, the same talcose aggregates, with interbedded granular quartz, limestone, etc.

Ebenezer Emmons, 1799

He would have someone write these on a chart that they could hang on the wall during the unit.

Applied palaeontology in the Chalk Group: quality control for geological mapping and modelling and revealing new understanding

The form or shape of an object or system is frequently related to use, operation, or function. The latter, in Alamance county, is a valuable stream for country mills, and for small manufacturing establishments.

Chalk rafts in Anglian till in north Hertfordshire

Fuel is plenty, its growth rapid; and into whatever channel a manufacturing spirit may be turned, it has the most flattering prospects of success.

Nitrous oxide production and consumption in British limestone aquifers

These include faults and earthquakes, volcanoes and volcanism, mountains and mountain building, and even the origin of the continents and ocean basins. These should be presented in a way that allows students to receive constructive feedback on the quality of thought and expression and the accuracy of scientific explanations. Suitable tasks for children at this age should have clearly defined purposes and be related with the other content standards.

Hengistbury Head, Dorset

For years, he had collected odds and ends—string and plastic, paper towel rolls and egg cartons, Styrofoam peanuts, cotton and other packing material. They do not appear to form a distinct trackway, more of a meandering stroll assemblage.
