The riddle of the universe at the close of the nineteenth century : Haeckel, Ernst Heinrich Philipp August, 1834

Between 1859 and 1866 Haeckel worked on many phyla, such as , and segmented worms. In the Spring of that year he drew figures for the book, synthesising his views of specimens in Jena and published pictures to represent types. This opinion was also shared by the scholarly journal, Der Biologie, which celebrated Haeckel's 100th birthday, in 1934, with several essays acclaiming him as a pioneering thinker of Nazism.

The riddle of the universe : at the close of the nineteenth century : Haeckel, Ernst Heinrich Philipp August, 1834

Some scientists of the day suggested Dubois' Java Man as a potential intermediate form between modern humans and the common ancestor we

share with the other. Haeckel supported the theory with that have since been shown to be oversimplified and in part inaccurate, and the theory is now considered an oversimplification of quite complicated relationships, however comparison of embryos remains a powerful way to demonstrate that all animals are related.

The Riddle of the Universe at the close of the nineteenth century by Ernst Haeckel

By combining the thought of Spinoza and Darwin into a unified theory of the universe, with help from Schopenhauer and Goethe, Haeckel elucidates a secular cosmology for rational thinkers of the modern world. Secularism and religion in nineteenth-century Germany.
