Partnerships Between Correctional Agencies and Community

As such, the rate of jail re-incarceration is substantially elevated, even compared to prison populations. Under a new risk-benefit framework, studies should be evaluated through a dynamic process of balancing risks and benefits, thus removing the need to rely on static definitions and categories. Beyond Consent: Seeking Justice in Research.

Correctional Service of Canada CSC Research

More attention needs to be paid to risks and risk-benefit analysis rather than the formalities of an informed consent document.

Correctional Service of Canada CSC Research

See for an illustration of current challenges and potential targets for research and policy.

Friends in locked places: An investigation of prison inmate network structure
