California Forests

Shade is very important to the survival of young seedlings. This prompted efforts to see what might be done about growing aspen and white spruce on the same landbase by protecting existing white spruce advance growth, leaving a range of viable crop trees during the first cut, then harvesting both and spruce in the final cut. Why is the City doing a Specific Plan in my area? This survey is a crucial element of the plan.

Planning and Development

Interior Spruce Seedling Performance: State of the Art. For information on , please see.

California Forests

Seeing Like a State: Nature and Space. In addition, the committee will evaluate current environmental justice policies and state guidance, relevant to general plans.
