**Frameworks for emergency nursing assessment and management: the Components of Life Model and the Jones Dependency Tool**

Rates of ED visits rose between 2006 and 2011 for almost every patient characteristic and location. Nursing considered as a moral practice: a philosophical-ethical interpretation of nursing.

**Blurring boundaries: professional perspectives of the emergency nurse practitioner role in a major accident and emergency department.**

Because time is such an essential factor in emergency treatment, EDs typically have their own diagnostic equipment to avoid waiting for equipment installed elsewhere in the hospital. These consequences challenge the ethical quality of emergency care.

**The prescriptive emergency nurse practitioner: an analysis to substantiate ENPs' inclusion within current legislative proposals**

Various studies reported significant associations between waiting times and higher mortality and morbidity among those who survived.

**Blurring boundaries: professional perspectives of the emergency nurse practitioner role in a major accident and emergency department.**

The NRC's formal evaluation determined that, in view of the threat environment, the emergency preparedness planning basis remain valid.
