Real time applications include polar plots of runout with interruptions relating to balance and relative motions between parts, radial growth measurements, and temperature of the spinning part.

Dental Cosmos

The method that is as old as any man in the room probably — Labarraque's solution of chlorinate of soda, treated afterward with an alkaline solution, and dried, is probably the simplest bleaching process that we have that offers the greatest probability of permanent success.

The American Musical Landscape

After drying the tooth and thoroughly disinfecting it, I tried pyrozone, and after two treatments it was thoroughly bleached.

Dental Cosmos

For the realization of more sophisticated optical interactions of the actors with the virtual environment, such as occlusions and shadows, an object-based 3D description of scenes is needed.
