**Full text of its raw material, manufacture, properties and uses; a handbook for manufacturers of celluloid and celluloid articles, and all industries using celluloid; also for dentists and teeth**

Two P.Jates and 6 Illustrations. The case is parallel to the result obtained with sized paper in comparison with unsized, the dissolved colour in the present case penetrating with the wax into the pores of the celluloid, whereas the colour would run on the untreated celluloid.

## Methods of Gas Analysis

Benzene Toluene Xylenes Higher homologues Naphthalene Higher-boiling aromatic hydrocarbons Non-saturated fatty hydrocarbons.

## Technical Chemists' Handbook

But since during the last fifty years, coal-tar and ammoniacal liquor have become starting-points for a chemical industry of enormous extent, they have also become factors contributing very greatly to the revenue of gas-works ; and it can hardly be denied that circumstances might occur in which these two substances would be the principal products of the dry distillation of coal, so that the gas would only appear as a secondary product.

## The alkali

The matrices are placed between these wires so that the fronts and backs are exposed to the ascending heat.

## Technical Chemists' Handbook

Cheaper soaps are produced from lower grade materials hardened with alkaline solutions.

### **Corrosion tables — Sandvik Materials Technology**

The arrangement of ley tanks in a Marseilles soapworks false A as follows No. The oil contains some 90 per cent. Sesame oil is sometimes used, the object of the oil, of whatever kind, being to impart to the oleomargarine the suppleness of butter.
