Why work on beneficial ownership? Countries ranked in the upper quartile on economic freedom had annual growth rates of 2. Simply improving the ability of a country to raise additional tax and revenue from its citizens without ensuring that these resources will be well spent will not achieve the desired development outcomes. II.16.1 Domestic Resource Mobilization and Illicit Financial Flows

The Tanzanian government has a similar project, a component of the Open Government Partnership OGP action plan, which seeks to improve public transparency and hold governments and citizens accountable. Why work on open budgets? But this will require tremendous political will on the part of developing countries, which will need to tackle the existing barriers to greater reform. To that end, Burkina Faso made a commitment in its 2019 OGP action plan to make information about the mining sector and its EITI involvement more accessible.

Domestic Financial Resources

When economies are growing, tax revenues are generally buoyant and financing more plentiful. International Development Research Center Interpersonal violent acts have high economic, social and psychological costs which often hold perpetrators and victims in a cycle of poverty. We hope that reformers build on the strong work highlighted here as they continue to use OGP as a platform for making credible changes toward more

open, participatory, and accountable government.
