## Girton Complex

If you like to hide away and be at one with nature this is worth a look, PROPER CARPY. The gate will be locked overnight with permitted night fishing only within those times.

## Thornton Gravel Ponds #2 & #3

Hand in Hand für eine nachhaltige Angelfischerei. Ecological processes such as preferences for spawning substrate and foraging habitat might explain these findings.

## Thornton Gravel Ponds #2 & #3

This means avoiding making unnecessary journeys, combining trips and avoiding travel at peak times where possible.

## Thornton Gravel Ponds #2 & #3

However, eel populations in unconnected gravel pit lakes completely rely on stocking through recreational-fisheries management Emmrich et al.

## Fishing the 'Burbs: Small Suburban Ponds Offer Big Fun for Anglers

Transect variables and habitat structures along the shoreline The extent of different shoreline structures and average transect depth were visually determined for each transect at every sampling event.

## County Pit Maps

With that being said, there are plans in place to construct new facilities, with rumours around the lake suggesting that it could happen sooner, rather than later. Select County Below Note: Some counties require more that one map. Crankbaits, spinnerbaits, plastic worms and topwater plugs all work well for bass.

## **Environmental determinants of fish abundance in the littoral zone of gravel pit lakes**

GIRTON C - Girton C, known as Georges lake, to the North of the venue is a fairly new water of 25 acres. Horcott Lake At A Glance Horcott Lake is in excess of 20 acres in size and boasts a total of 40 pegs for members and day ticket anglers. Under the current management since 2014, a stocking programme was undertaken and has been largely successful, with many of the recent additions showing fantastic growth rates and are now being caught at similar weights to some of the original fish.
