## **Nursing Diagnoses in Psychiatric Nursing: A Pocket G... (0803685815) by Townsend, Mary C.**

Because denial is the major defense mechanism in addictive disease, confrontation by peers can help the patient accept the reality of adverse consequences of behaviors and that drug use is a major problem. Good; Some wear, but still a good reading copy. For risk nursing diagnosis, no signs and symptoms are present therefore the factors that cause the client to be more susceptible to the problem form the etiology of a risk nursing diagnosis.
