### What is Materials Science and Engineering?

Materials scientists and engineers create new materials and develop processes to improve existing materials to suit the needs of everyday life. Engineers who pass this exam are commonly called engineers in training EITs or engineer interns EIs.

### Department of Materials Science and Engineering

From cell phones to laptops, bone implants to Apache helicopters, applying knowledge learned in the materials science program is boundless. MSE is the field that leads in the discovery and development of the stuff that makes everything work. Industrial engineering technicians help industrial engineers implement designs to use personnel, materials, and machines effectively in factories, stores, healthcare organizations, repair shops, and offices.
