Glossary

It is typically reserved for small projects with straightforward, clearly defined requirements since a sequential development process makes it difficult to revisit the analysis and design phases once testing has begun.

Information Management and Protection (IM&P) Glossary of Terms

Matrix organization - Employees in a matrix organization report to more than one boss, with different lines of reporting representing different organizational projects or functions. It is used to create a project schedule. DESCRIPTION The process of establishing intellectual control over holdings of an archival institution through preparation of finding aids.

Records Management Glossary

Case study - A case study involves extensive and in-depth formal research into an area of a company, a situation, or an event. Schedule variance - is the difference between earned value and planned value at a given point in time.

ARMA TR 22

Compliance with OCIO guidelines is not mandatory. Description is typically captured in a finding aid.

Glossary of Library Terms

Informational Value The value of a record derived from the information it contains on persons, places, etc. Records Management — see Records Retention and Disposal Schedule RRDS — A records retention and disposal schedule is a legal document that guides the management of a government record.

Records Management and Archives: Definitions

Use of a contingency reserve is typically authorized upon the occurrence of a contingency. Story point - In sprint-based projects, a story point is a measure of the amount of work required to implement a particular user story.

Glossary

Resource loading profiles - Resource loading profiles indicate the number and type of personnel required to do project work over periods of time.
