Canadian Woods: Their Properties and Uses on JSTOR

. About half the plywood consumed in Canada is used in house building and agricultural construction; industrial uses take up another third; the balance is consumed in a multitude of miscellaneous uses. Will accept paint fairly well.

Canadian Woods : Their Properties and Uses (1981, Hardcover, Revised edition) for sale online

The rough plywood panels are then trimmed and may be sanded.

Lumber Grades Explained

The art of manufacturing paper spread slowly; it was not until 650 years later that paper was produced outside of China, first in Samarkand in 751 ad and then in Baghdad in 795 ad.

Lumber Grades Explained

Stress-Graded Lumber Grades Softwoods that are stress-graded are used as beams, posts, studs, rafters, and joists, for example, where the material is functioning in a load-bearing capacity and working stresses will be applied. Canada's forests are one of its most important natural resources.
