Low

Trans Geol Soc South Afr 83, 2 pp 255—283. Such organisations are usually given reasonable budgets for maintenance and employ technically qualified staff including private-sector contractors.

Low

This is how the world looks like.

Low

Border Ohangwena Oshigambo 19 Labour-based Construction E Graded every second week. From Endola to Omafui it still has to be constructed. Although the pavement is still in a fair condition it shows signs of pavement distress.

Figure 5 from The use of calcrete in paved roads in Botswana.

Appropriate equipment should be used for an optimised usage on labour-based built roads like for retarding minor deformations like corrugations during the dry season.
