Gender Ratio

Gender theory is only of interest to a minority of historians.

4.4 Socialization Through the Life Course

These ratios are much more skewed towards boys. Through such tests, it is known that American southerners exhibit less egalitarian gender views than their northern counterparts, demonstrating that gender views are inevitably affected by an individual's culture. Now that historians were dimly acknowledging the legitimacy of women's history, the argument went, why should such progress be thrown aside to do gender history? Progress along trajectories is age-graded such that some transitions can be viewed as more age appropriate while others violate normative social timetables by occurring too early or too late Hagestad and Neugarten 1985.

4.4 Socialization Through the Life Course

Many get married, some have children, and most obtain their first full-time job. In addition, girls and women have a great amount of social support, which also leads to lower rate of crime.

Life Course Theory

Indeed, generations or cohorts are not homogeneous collections of people.

Gender role

Meanwhile men were seen as naturally entitled to office work, especially to promotions and managerial positions. Women are always accused of fewer, and different, crimes from men, and this was also true at the Old Bailey. London and New York, 1994.
