

# Studies in the chemistry of nitrogen and sulphur heterocycles.

University of East Anglia - Metalloid

Description: -

-Studies in the chemistry of nitrogen and sulphur heterocycles.

-Studies in the chemistry of nitrogen and sulphur heterocycles.

Notes: Thesis (Ph.D.) - University of East Anglia, School of Chemical Sciences, 1967.

This edition was published in 1967

Boron, silicon, arsenic, and antimony have medical applications, and germanium and tellurium are thought to have potential. Hyperforin exhibited an excellent effect against methicillin-resistant strains of *Staphylococcus aureus* with a MIC value of 1. With decapitated plants Cl was displaced, moving upwards in the exuding sap.

The cell membrane injury induced by nanoparticles studied using the lactate dehydrogenase assay, showed both concn.

Prof. Lee Cronin

The discovery of the in vitro and in vivo photodynamic activities of hypericin as a photosensitizer generated great interest, mainly to induce a very potent antitumoral effect. MISPE procedure was developed for enrichment and sepn.

CHRIST UNIVERSITY

Both longitudinal T1 and transverse relaxation times T2 were measured by appropriate spin-echo sequences. In the present study, we investigated the biodistribution of hypericin in an orthotopic rat bladder tumor model by assessing the extent of hypericin penetration and the kinetics of accumulation into rat bladder tumors and normal bladder wall. Rayner-Canham has argued that these similarities extend to carbon-phosphorus, nitrogen-sulfur, and into three series.
