This book gives the readers many references and knowledge that bring positive influence in the future.

**Hagia Sophia Mosaics**

The narthex outside at the eastern part of atrium is enclosed, and the inner narthex is entered by 5 doors, and from this inner narthex there are 9 doors to the nave. The crown of the dome rises 180 feet 55 meters above the floor. Hagia Sophia is the most important Byzantine church built in the 6th century, which became a model for all the former architecture.
