Public Health and Community

The third edition of *Community Nutrition: Planning Health Promotion and Disease Prevention* provides students and professionals with the knowledge, skills, tools, and evidence-based approaches they need to effectively promote health and prevent disease. The aim of *Community Nutrition* actions is to adequate lifestyles related to food consumption patterns in order to improve the quality of life and contribute to health promotion of the population in the community where programs and services are delivered. Reflecting the latest direction in public health and community nutrition, it considers the comprehensive approach taken by practitioners providing community-based services that emphasize primary, secondary, and tertiary prevention.
