Untitled 1

The implications of philopatry in sharks for the management of shark fisheries. Applications of biological research topics.

UW Friday Harbor Laboratories Historical Timeline

These assignments require higher-level mastery of the subject matter and additional deliverables representative of graduate-level work, as determined by the instructor. It will be seen that genetics and development are part of a continuous process and that the genetic mechanisms and developmental patterns of living organisms reveal a fundamental kinship of life on earth.

Integrated Principles of Zoology (Hickman)

The total space given to tanaid coverage is not much greater than that given in the 3rd edition, but the number and diversity of drawings, detailed ecological notes, and improved, updated key greatly increase the usefulness of the contents. Additionally, this edition greatly expands the geographic range covered from the central Californian coast, as in the previous editions, northward into Oregon.

Biology > California Lutheran University

This section is similar in size to that of the 3rd edition, but it is completely updated with revised keys to suborders and species, newly included illustrations, and detailed distributional and ecological data for many species.

Untitled 1

Lecture 2 hours, lab 6 hours.

Invertebrate Zoology Homepage

Marine and Freshwater Behaviour and Physiology 33:233-248. Total credit limited to 12 units.
